## **With All Wonderful Insights into the Lunar Year of Dog, We Are Well Prepared and Ready for the Prosperity.**

The annual decoration competition was held on February 12 right before the Chinese New Year. It has become a tradition at Taipei Prison to decorate the whole complex, create cheerful atmosphere and get ready for the new year especially for the coming "Prosperous Year of Dog in 2018".

Inmates work with all the personnel and organize creative ideals to make the prison more colorful and cozy, which turn around the outside impression on prison.

Most of them use recycling materials to create amazing decoration and promote environmentalism. For example, the primary school classes of Hongde Extension School built a splendid maple tunnel similar to those viewed in Hokkaido, Japan.

The other excellent idea constructed a magnificent castle with daily waste. The recycling cotton flown around creating marvelous visual effect of cloudy sky. The pleasant experience is just like those in carnival.

This event tries to boost up the morale and trains the communication and cooperative skills among inmates in order to have better interaction with their society after released. Thus, they can redefine the value of life and reshape their future career with righteousness.
